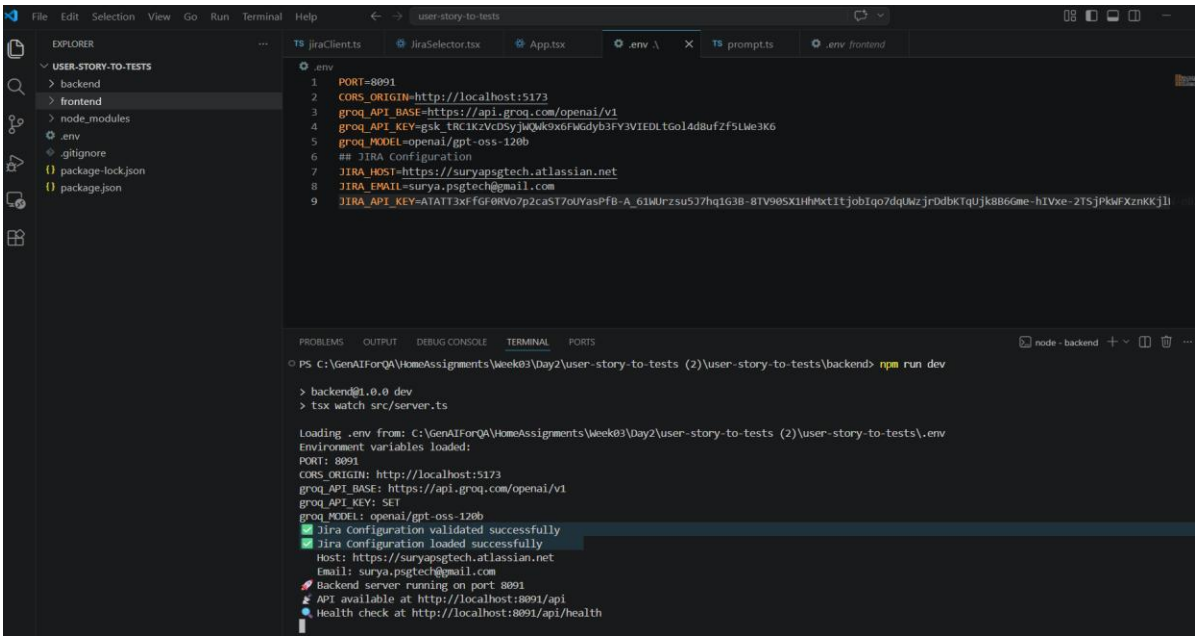
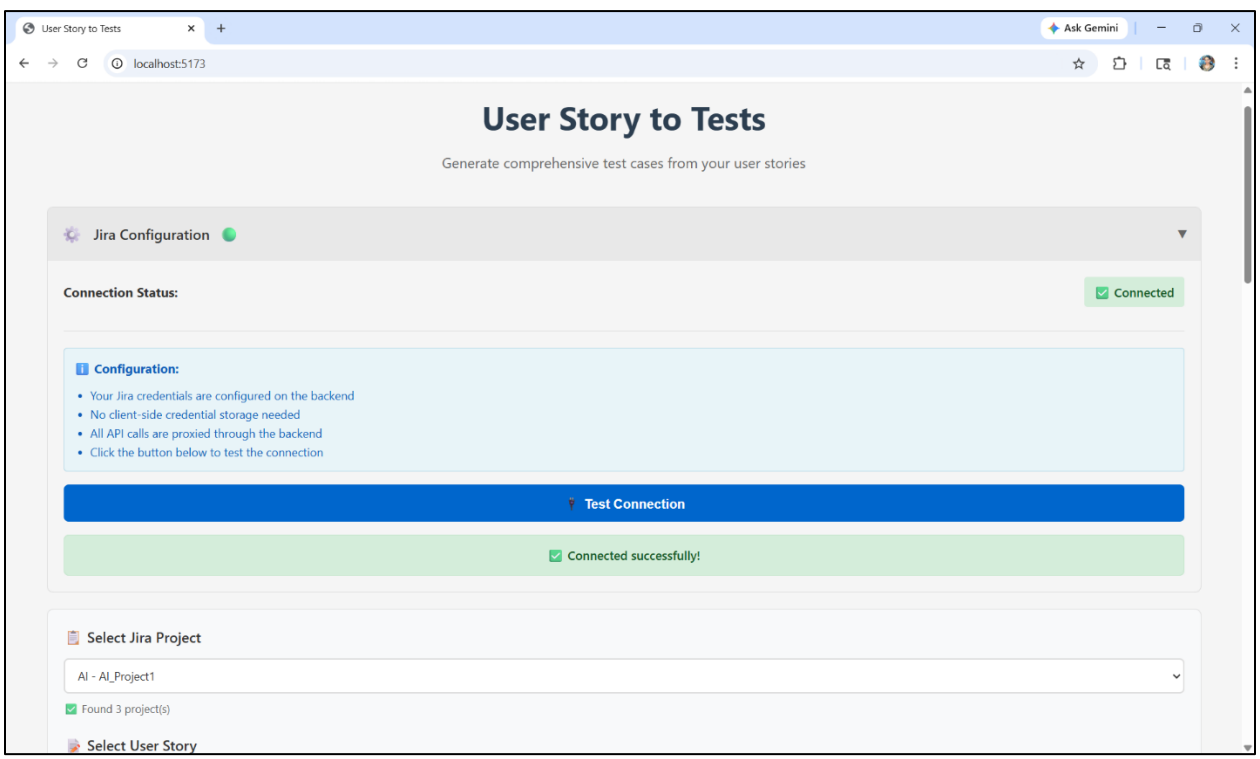
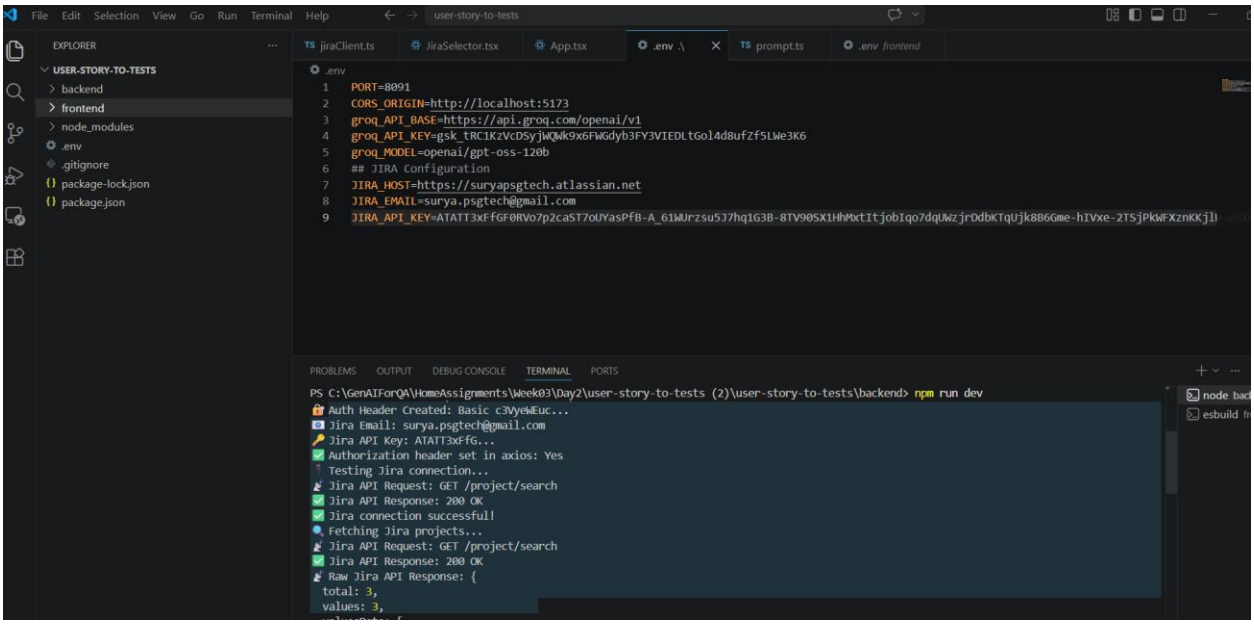
USER STORY TO TEST

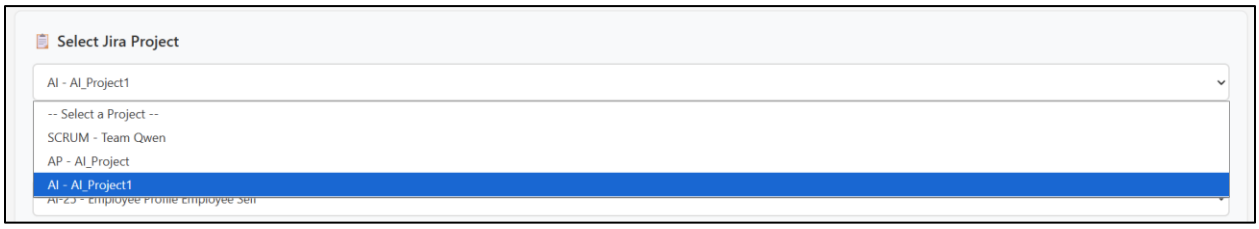
STEP1: JIRA connection via API established successfully



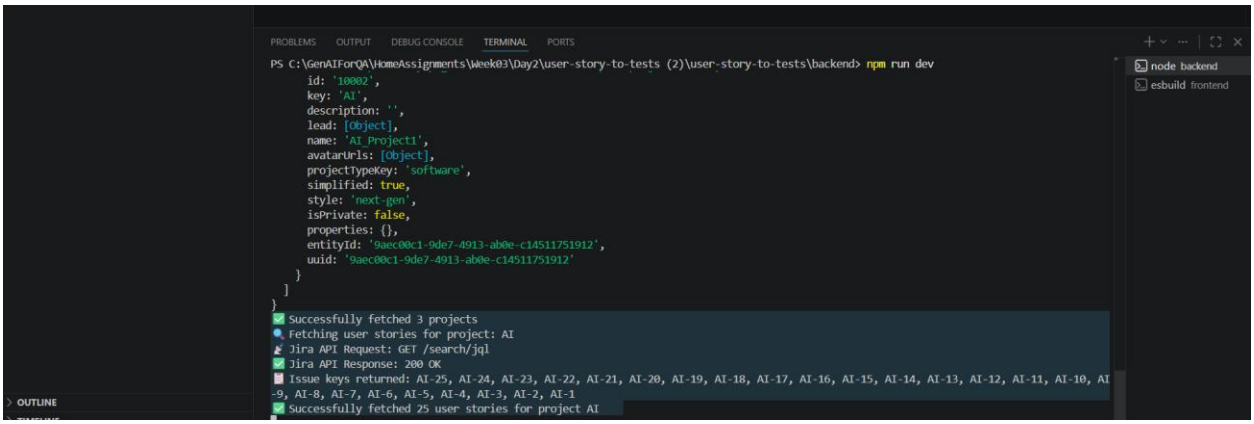


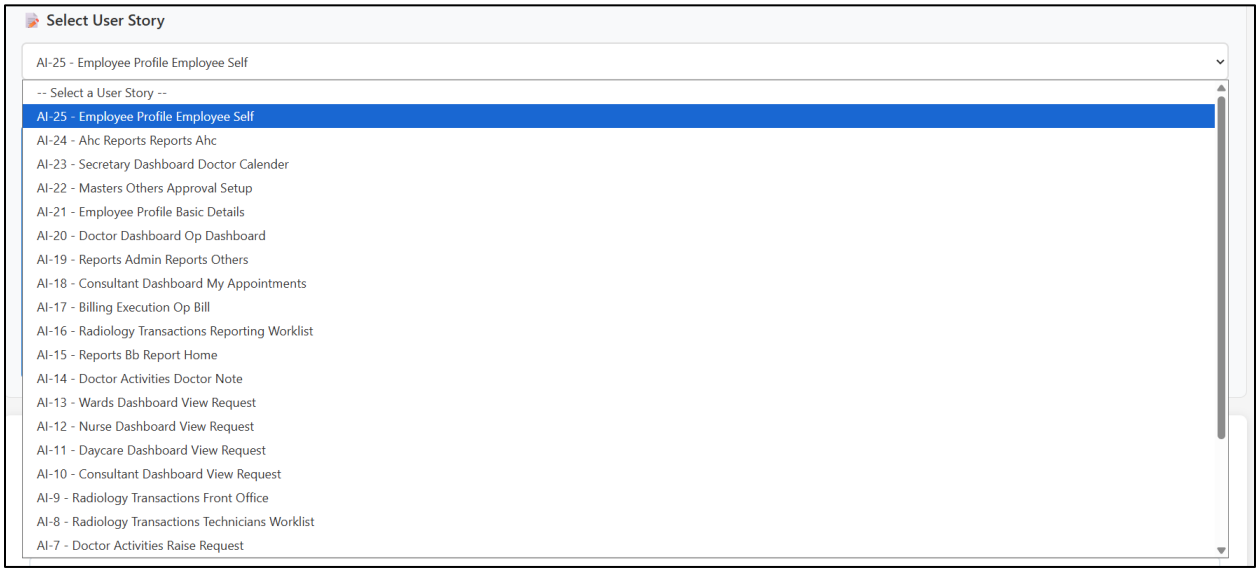
STEP2: JIRA Projects are available in the drop down for selection





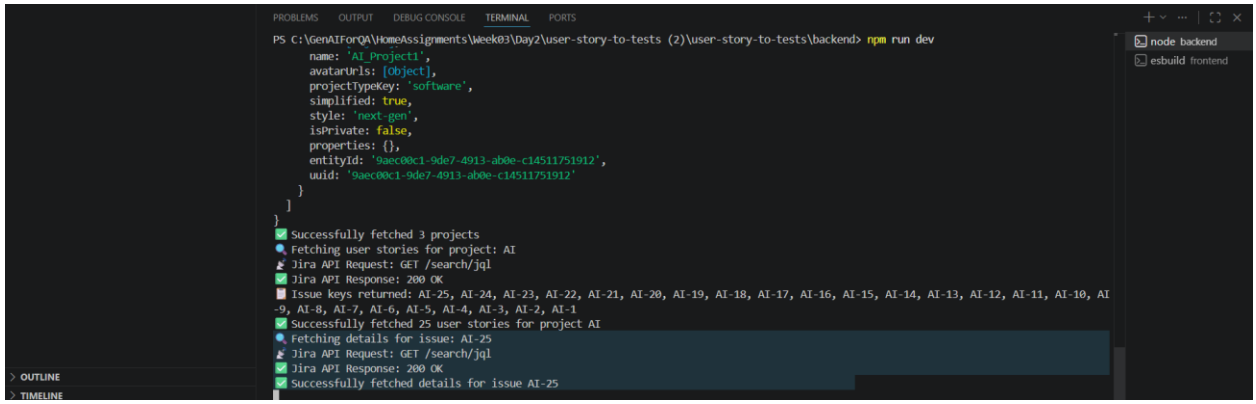
STEP3: Upon Selecting a JIRA project, the user stories corresponding to the project are available in the drop down.

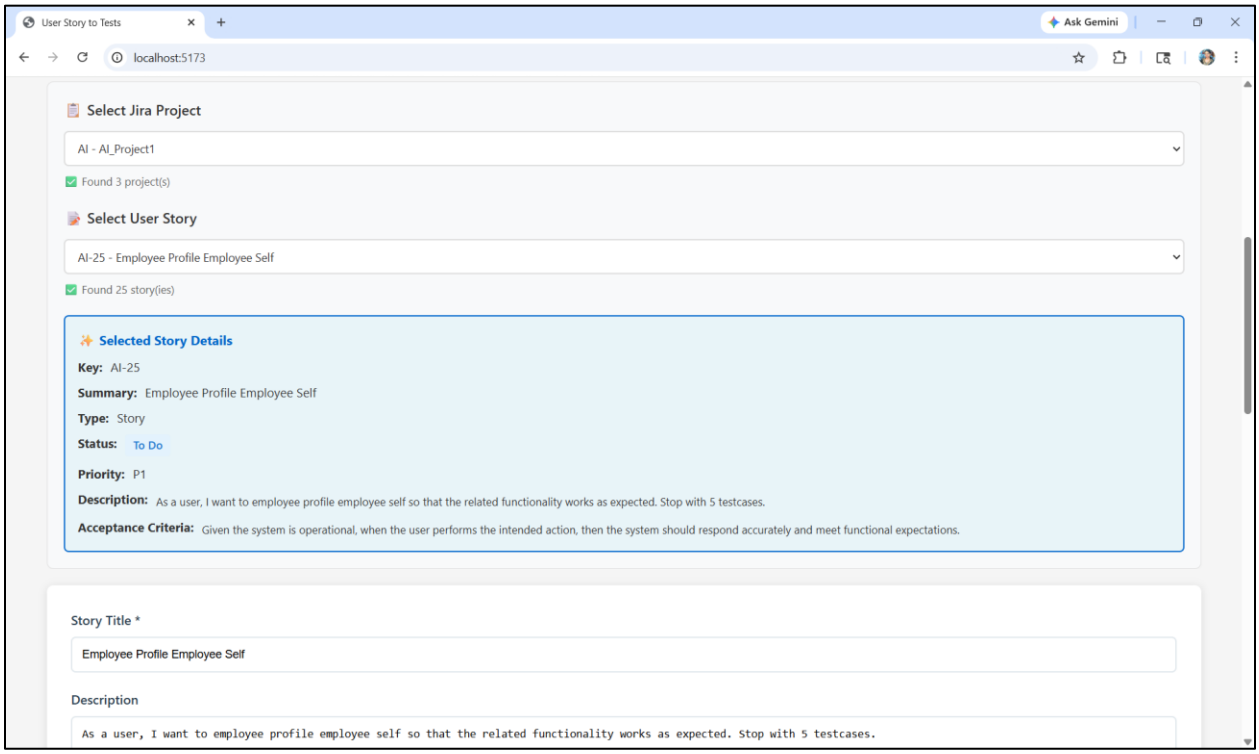


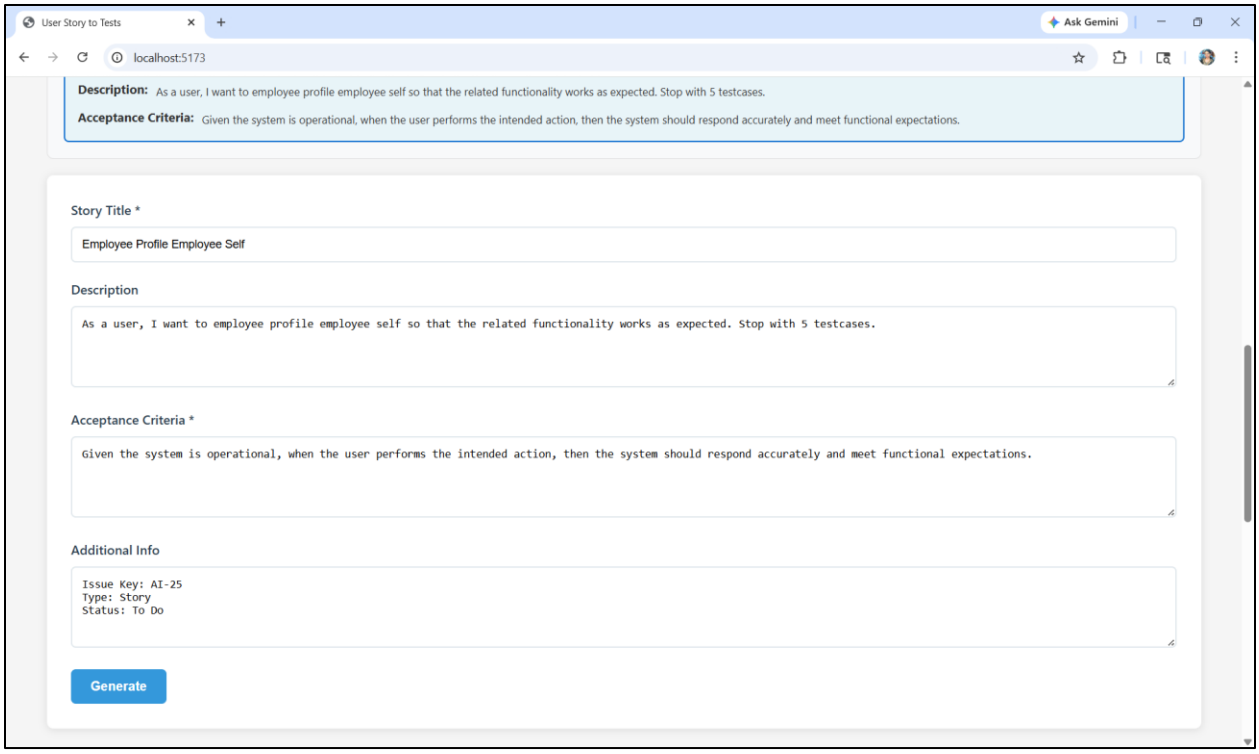


STEP4:

a. Upon Selecting a user story, a preview of the story is displayed.
b. Story title, Description and Acceptance Criteria text area fields are populated according to the user story.







User Story to Tests
Ask Gemini
localhost:5173
Description: As a user, I want to employee profile employee self so that the related functionality works as expected. Stop with 5 testcases.
Acceptance Criteria: Given the system is operational, when the user performs the intended action, then the system should respond accurately and meet functional expectations.
Story Title *
Employee Profile Employee Self
Description
As a user, I want to employee profile employee self so that the related functionality works as expected. Stop with 5 testcases.
Acceptance Criteria *
Given the system is operational, when the user performs the intended action, then the system should respond accurately and meet functional expectations.
Additional Info
Issue Key: AI-25
Type: Story
Status: To Do
Generate

STEP5: Clicking on “Generate” button, the test cases are generated successfully.

```
PROBLEMS   OUTPUT   DEBUG CONSOLE   TERMINAL   PORTS
PS C:\GenAIForQA\HomeAssignments\Week03\Day2\user-story-to-tests (2)\user-story-to-tests\backend> npm run dev

User Story to Tests | localhost:5173

Generated Test Cases

5 test case(s) generated • Model: openai/gpt-oss-120b • Tokens: 2246

Test Case ID	Title	Category	Priority	Expected Result
TC-001	View own employee profile successfully	Positive	High	The system displays the logged-in employee's profile with correct name, employee ID, contact details, and role information.
TC-002	Update profile with valid data	Positive	High	Profile is updated, a success message is shown, and the new phone number and email are reflected in the profile view.
TC-003	Attempt to save profile with invalid email format	Negative	Medium	The system prevents saving, displays an inline validation error indicating an invalid email format, and retains the original email value.
TC-004	Attempt to save profile with mandatory field left blank	Negative	Medium	The system blocks the save operation, shows a required-field error for 'First Name', and does not modify the profile.
TC-005	Update profile with maximum length name field	Edge	Low	The system accepts the input, updates the profile, and displays the full 255-character last name without truncation or error.
