

RAG Knowledge Intelligence Console

Login

The screenshot shows a web browser window with the title 'Enterprise RAG Platform'. The address bar shows 'localhost:5173'. The page has a dark blue gradient background. At the top, it says 'ENTERPRISE AI KNOWLEDGE PLATFORM' in small blue letters. Below that, the main title 'RAG Knowledge Intelligence Console' is displayed in large white letters. Underneath the title, it says 'Sign in to access the platform'. In the center, there is a dark blue rounded rectangle containing a 'Sign In' form. The form has two input fields: 'USERNAME' with the value 'testuser' and 'PASSWORD' with masked characters. Below the fields is a bright blue 'Sign In' button. Under the button, it says 'Access token is valid for 15 minutes.' At the very bottom of the page, in small white text, it says 'Enterprise RAG Console | React • TypeScript • Tailwind'.

Knowledge Ingestion – Document upload and Document Analysis

Uploaded a document (Resume)

Document Preview and Document Processed Status

Document Analysis (Click on Analyze button)

Information about the document is displayed

The screenshot displays the 'Enterprise RAG Platform' interface in a web browser. The left sidebar lists modules: Knowledge Ingestion, Chunking and Embedding, Search Studio, RAG Question Answering, Agentic Retrieval Workflow, Document Comparison, and Analytics Dashboard. The main content area shows the 'Upload Result' for a PDF file named 'Jennifer J .pdf', which has been processed. Below this is a 'Current Session Preview' section with an 'Analyze' button. The 'Document Intelligence' section provides a table of document statistics:

TYPE	PAGES	WORDS	LANGUAGE
technical_document	14	549	en

The footer indicates the platform is built with React, TypeScript, and Tailwind.

Chunking and Embedding (UI)

The screenshot shows the 'Enterprise RAG Platform' interface with the 'Chunking and Embedding' module selected. The main header reads 'RAG Knowledge Intelligence Console' with a 'Sign Out' button. The left sidebar is the same as the previous screenshot. The main content area features a 'Platform and API Status' section showing the API base URL as 'http://localhost:2787' and the health status as 'UP'. Below this is the 'Chunking Studio' section, which includes a 'Generate Chunks' panel with a 'Fixed Size Chunking' dropdown set to '120' and a 'Generate' button. The 'Compare Strategies' panel shows 'Fixed Size Chunking' and 'Recursive Chunking' dropdowns, with a 'RECOMMENDED STRATEGY' section highlighting 'Semantic Chunking' as the best baseline for predictable chunk sizes and simple performance profiling.

Recommended Chunking strategy is Semantic.

Selected Structure-based chunking

Compare Semantic (Recommended) and Structure based chunking strategies

- Chunking and Embedding**
- Search Studio
- RAG Question Answering
- Agentic Retrieval Workflow
- Document Comparison
- Analytics Dashboard

Generate Chunks

Structure-Based Chunk 0200

Optional query context (recommended for Query-Aware)

Best for documents with headings/sections where boundaries should follow document layout.

Generate

GENERATION SUMMARY

Chunks: 22
Avg words/chunk: 24.95
Min-Max words: 9 - 73

Compare Strategies

Semantic Chunking Structure-Based Chunk

Optional shared query context for both strategies

RECOMMENDED STRATEGY

Semantic Chunking
Long narrative content usually benefits from sentence-coherent chunks rather than rigid fixed windows.

200

Compare

STRATEGY A (SEMANTIC)	STRATEGY B (STRUCTURE-BASED)
Chunk overlap: 100%	Chunk overlap: 13.29%
Token distribution: 77.26%	Token distribution: 35.88%
Context preservation: 100%	Context preservation: 100%
Retrieval accuracy: 92.04%	Retrieval accuracy: 55.88%
Context completeness: 95.45%	Context completeness: 78.51%

Uploaded Resume (Jennifer Resume) in MongoDB

The last record (59th record) has Jennifer resume.

The screenshot shows the MongoDB Cloud interface for the 'Enterprise RAG Platform'. The left sidebar contains 'Data Explorer' with options for 'My Queries', 'Data Modeling', and 'CLUSTERS'. The main area displays the 'documents' collection in the 'db_enterprise_rag' database. A table of documents is shown, with the 59th record highlighted. The table columns are: _id, document_id, content, content_type, and filename. The 59th record is a resume for Jennifer J UI / UX Design.

Search Studio

The screenshot shows the 'Search Studio' interface. The left sidebar contains 'MODULES' with options: Knowledge Ingestion, Chunking and Embedding, Search Studio, RAG Question Answering, Agentic Retrieval Workflow, Document Comparison, and Analytics Dashboard. The main area displays 'Platform and API Status' with API Base URL 'http://localhost:2787' and Health 'UP'. Below this is the 'Search Studio' section with a search bar containing 'Educational qualification of the candidate', mode set to 'hybrid', target set to 'document', and top k set to 5. The search results show 5 results, with the first result being a resume for Jennifer J UI / UX Design.
