Objective

Document the execution of the No-Code automation assignment, issues encountered, fixes applied, and final successful execution.

Scope

Automate the USAA life insurance quote flow using the no-code framework.

Scenario

Feature: Get a life insurance quote

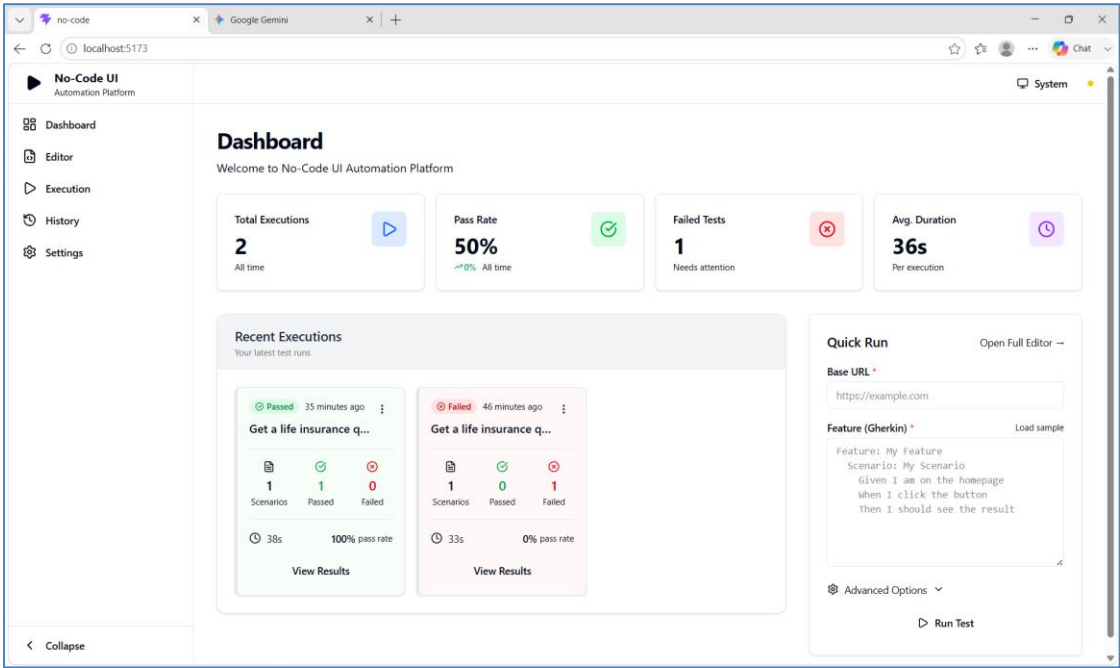

Scenario: Get a life insurance quote for a 10-year term

Given Click on "Life insurance" link
And Click on "Get a quote for Term Life" button
When "Check Your Life Insurance Estimate | USAA" page is navigated
Then I select "Texas" from "State" dropdown
And Click on "Continue" button
And Click on "Female" button
And I enter "35" in the "Age" field
And Click on "Continue" button
And I select "5'3\" from the "Height" dropdown
And I enter "110" in the "weight" field
And Click on "Continue" button
And I select "I've never used"
And Click on "Continue" button
And Click on "No" button
And Click on "No" button
And Click on "None" button
When I enter "100000" in the "coverage amount" field
And I select "10-Year Term" from the "Term length" dropdown
When I click on the "Get my quote" button
Then I wait for 20 seconds
And I should see the "Estimated monthly price"
And Close the browser

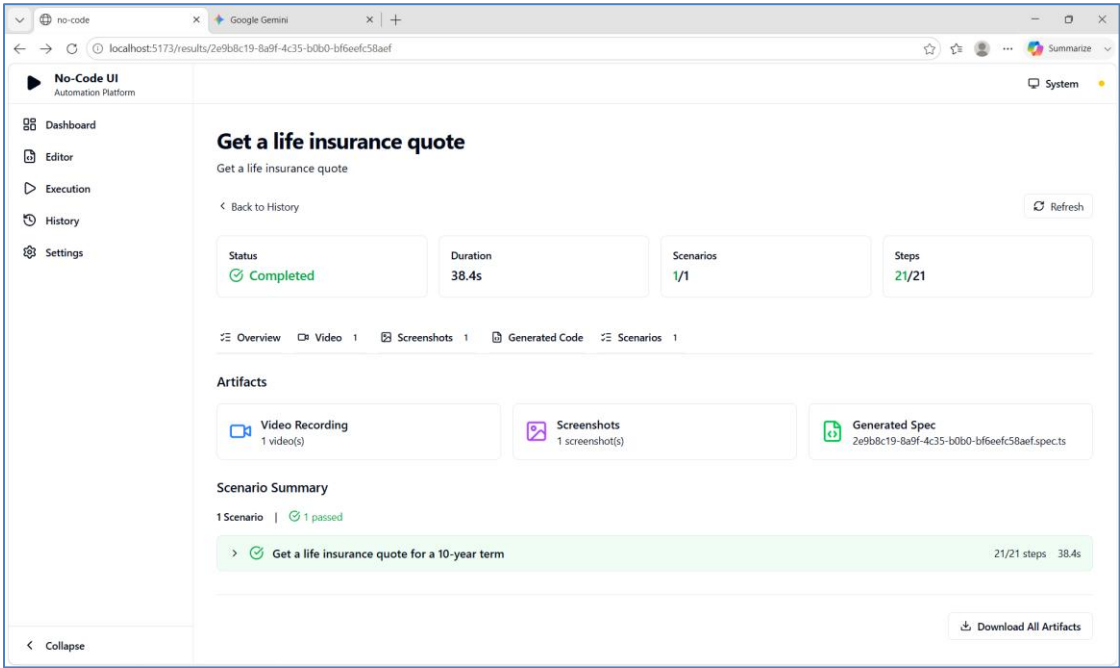

Execution Summary

Initial execution encountered two issues: dropdown parsing for height value containing embedded quotes, and insufficient wait time before quote page loaded.

Final Execution Screenshot

Root Cause Analysis

- Regex parser failed to correctly parse embedded quotes in values such as 5'3".
- Final quote page required additional wait time.

Fixes Applied

- Upgraded regex patterns to delimiter-based parsing.
- Normalized extracted values.
- Implemented quote-aware scanner.
- Added normalization helper.
- Updated heuristic path.
- Added explicit 20 second wait after Get my quote.

Enhancements

- Unit tests for special-character parsing.
- API tests for mapping endpoints.
- Feature files covering embedded quotes.

Conclusion

After implementing the parser improvements and synchronization wait, the automation executed successfully and displayed the Estimated Monthly Price.
