

Health Check

The screenshot shows the Postman interface with a REST client request configured. The request is a GET to `http://localhost:3000/v1/health`. The response is a 200 OK status with a response time of 41 ms and a body size of 528 B. The response body is a JSON object:

```
{
  "status": "success",
  "data": {
    "name": "Resume Search API",
    "version": "1.0.0",
    "uptime": 50.9784614
  },
  "meta": {
    "requestId": "42f25877-375c-4b07-afe5-fedfde1631d6",
    "timestamp": "2026-05-28T06:20:51.929Z",
    "durationMs": 0
  }
}
```

The left sidebar shows a collection named 'resume-al' with a sub-collection 'health-check' selected. The right sidebar shows a 'New Chat' section with a message: 'Start using Agent Model! Your plan includes 50 AI credits per month to use Agent Mode.'

Health Check – db

The screenshot shows the Postman interface with a REST client request configured. The request is a GET to `http://localhost:3000/v1/health/db`. The response is a 200 OK status with a response time of 91 ms and a body size of 520 B. The response body is a JSON object:

```
{
  "status": "success",
  "data": {
    "status": "ok",
    "latencyMs": 78,
    "mongodbVersion": "unknown"
  },
  "meta": {
    "requestId": "e99472ff-55be-42de-02f2-3f024585fefa",
    "timestamp": "2026-05-28T06:21:12.309Z",
    "durationMs": 78
  }
}
```

The left sidebar shows a collection named 'resume-al' with a sub-collection 'health-check-db' selected. The right sidebar shows a 'New Chat' section with a message: 'Start using Agent Model! Your plan includes 50 AI credits per month to use Agent Mode.'

Mistral Embedding:

The screenshot shows the Postman interface for a REST client. The request is a POST to `http://localhost:3001/v1/embeddings` with a JSON body: `{ "input": "hello world" }`. The response is a 200 OK status with a JSON body containing a success message and a list of 26 floating-point numbers representing the embedding.

```
{
  "status": "success",
  "data": {
    "embedding": [
      -0.81953125,

The interface includes a sidebar with collections, a top bar with search and navigation, and a right sidebar with a chat window.

Hybrid Search

The screenshot shows the Postman interface with a REST client request configured. The request is a POST to `http://localhost:3001/v1/search/hybrid`. The body is raw JSON with the following content:

```
{
  "query": "Senior node.js developer with MongoDB expert",
  "topk": 5
}
```

The response is a 200 OK status with a response time of 605 ms and a size of 3.91 KB. The response body is JSON, showing a successful search result:

```
{
  "status": "success",
  "data": {
    "query": "Senior node.js developer with MongoDB expert",
    "topk": 5,
    "bm25": {
      "candidates": [
        {
          "_id": "6a17de8bde90625ad6a88c70",
          "name": "Karthik P",
          "role": "Senior Quality Assurance Tester",
          "company": "Clayfin Technologies",
          "snippet": "Karthik P Senior Quality Assurance Tester No -318,Venkateshpuram, kottivakkam Kuppam Road Chennai, 600041 7508403340 | karthikp4999@gmail.com Professional Summary Senior Quality Assurance T",
          "score": 5
        },
        {
          "_id": "6a17de8bde90625ad6a88c62",
          "name": "PRAVEEN P",
          "role": "Senior Software Engineer",
          "company": "Innova Solutions",
          "score": 5
        }
      ]
    }
  }
}
```

The interface also shows a sidebar with collections, including 'resume-al' and 'Hybrid-search', and a 'New Chat' button on the right.

The screenshot shows the Postman interface with a REST client request configured. The request is a POST to `http://localhost:3001/v1/search/hybrid`. The body is raw JSON with the following content:

```
{
  "query": "Senior node.js developer with MongoDB expert",
  "topk": 5
}
```

The response is a 200 OK status with a response time of 605 ms and a size of 3.91 KB. The response body is JSON, showing a successful search result with a detailed snippet:

```
{
  "status": "success",
  "data": {

1 {
2   "status": "success",
3   "data": {
4     "candidateId": "60f5a3e8b4c6a9d3f0e4a1b2",
5     "summary": "Jane Doe appears to be a strong fit for the senior Node.js backend engineer role, with direct experience in TypeScript and MongoDB. Her background in building scalable Node.js microservices and implementing MongoDB Atlas vector search aligns well with the job requirements. Additionally, her experience with LLM-based reranking suggests a relevant understanding of advanced search technologies. Notably, she has experience in a senior role and at a company, Acme AI, that likely works with AI technologies. No significant gaps in her qualifications are apparent from the provided snippet.",
